

USS-LIBERTY LD™

DOUBLE START THREAD CASING CONNECTION

100% tensile and compression efficiency

Two-step thread profile for deep stabbing and stable makeup

Internal torque shoulder; smooth bore inside diameter

Faster makeup using two-step, double-helix thread start

The USS-LIBERTY LD™ is a semi-premium casing connection designed for surface casing applications and intermediate offshore strings. Available in outside diameters ranging from 16 to 20 inches, this rugged connection features a deep stabbing, two-step thread profile for trouble free makeup every time.

FEATURES

- Two-step, double-start threads permit quick make-up (3-1/2 to 4-1/2 turns for final makeup)
- 100% efficient in tension and compression
- Hook thread design provides improved load carrying ability
- Rated to pipe body in burst and collapse pressure
- Tested to API 5C5 guidelines
