# OCTG PREMIUM SERVICES

TUBULAR FOCUSED, CUSTOMER DRIVEN

U. S. Steel's commitment to the tubular business is even stronger today than when it entered the energy business more than a century ago.

U. S. Steel offers a comprehensive line of OCTG Premium Services in addition to its industry-leading tubulars. Available services include API and premium threading and inspection, rig site services, licensed repair facilities and a host of proprietary tubing and casing accessories. A 150-acre facility provides secure storage for customer equipment, as well as a spacious staging area for rig preparation, well returns and pipe maintenance. With a unique ability to service projects from mill to well, U. S. Steel ensures reliable tubular solutions every time.

## THREADING SERVICES

U. S. Steel Oilwell Services specializes in complex threading of OCTG. The company provides API and premium threading of OCTG, ranging in size from 3.5" to 20" OD. Tubing and casing threading services encompass bucking, torque turn, saw cutting and full-length drift. All services can be performed at U. S. Steel Oilwell Services Offshore Operations state-of-the-art facility in Houston, Texas.

In addition, U. S. Steel offers ancillary threading services.

- Computer-controlled buck-on of float shoes, collars and mud hangers
- Swaging and sizing
- Phosphating
- Pipe maintenance
  - Sand and water blasting
  - Brush roll and spray
  - Cleaning and re-doping
- Secure storage with 24-hour access
- Export offshore packaging

## INSPECTION SERVICES

U. S. Steel provides a wide range of OCTG inspection services. These non-destructive testing services can be performed at U. S. Steel Oilwell Services' full-service facility in Houston, Texas.

- Full-body ultrasonic inspection
- Special end-area inspection
- Full-body drift
- Hydrostatic testing
- Weld-line inspection
- Electromagnetic inspection
- Visual inspection
- Dye-penetrant inspection

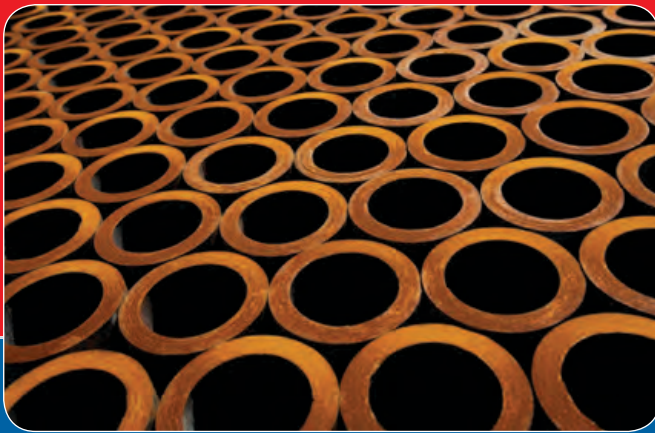

A 150-acre facility provides secure storage for customer equipment, as well as a spacious staging area for rig preparation, well returns and pipe maintenance.

## TUBING AND CASING ACCESSORIES

U. S. Steel Oilwell Services enables enhanced project performance and production through the supply of a wide range of tubing and casing accessories. Both proprietary and API standard accessories are available, including marker joints and pup joints. Many of these products are in stock and ready to deliver.

## RIG SITE SERVICES

U. S. Steel Oilwell Services offers technical support and on-site rig services around the clock. Whether service is scheduled or on an emergency basis, U. S. Steel responds 24/7/365. The U. S. Steel team is fully equipped to provide service and support at the rig site or at nearby storage facilities.

Rig Site Services personnel possess the expertise, experience and equipment to help ensure the integrity of the product that is run downhole. Their knowledge of the full technical specifications

and performance data for each product, as well as direct access to engineering and technical staff, provide peace of mind for customers worldwide. This high-value added service can protect your investment. Additionally, U. S. Steel Oilwell Services has a growing network of licensed repair facilities for more complex needs. Rig site services and benefits include:

- Assure correct running procedures are followed
- Visual inspection of connections
- Tools and training to perform field repairs
- Knowledge of full technical specifications and performance data
- Ongoing training and direct access to engineering and technical staff
- Direct contact with licensed repair facilities
